Student Success Network

Help students get the help they need!

The Student Success Network (SSN) is a tool you can access through Porches that alerts students of problems that may become barriers to success in your class.

• Poor scores
• Attendance issues
• Report non-attending students
• Missed assignments
• More!

With a couple of mouse clicks, you can notify students about problems and point them to available resources. It helps students to help themselves and informs them about where they stand in class before they come to your office. SSN helps make sure students have every chance to succeed in your class.

To access SSN, look for the link in the Faculty tab on Porches. Setup only takes a few minutes and it can save you time and effort later in the semester. Have questions or need help?

Contact Becki Lawhorn (rlawhorn1@udayton.edu) or Beth Lantz (alantz1@udayton.edu)

Other Features of the SSN:

• Complete Progress Surveys to quickly provide feedback on an entire course
• Manage office hours so students can schedule appointments
• Use KUDOS to provide positive reinforcement
• Share information automatically with academic advisors
