T. R. REID, foreign correspondent and author

Presenter:
DAVID MOEN, M.D., president of Bluestone Solutions LLC

Presenter:
KEN COBURN, M.D., M.P.H., co-founder, CEO and medical director of Health Quality Partners

The future is here. **On April 5, join us for Innovations in Healthcare Delivery**, the fifth annual University of Dayton and Miami Valley Hospital Healthcare Symposium. The symposium will highlight organizations and individuals making great strides in changing the ways health care is delivered — and improving outcomes and lowering costs. Sessions include:

U.S. HEALTH CARE: THE GOOD NEWS

T. R. Reid is one of the nation's best-known reporters through his coverage of global affairs for *The Washington Post*, commentaries on NPR and documentary films. His book *The Healing of America* was a best-seller and launched Reid into a national role of describing ways to provide health coverage for every American.

CREATING NEW VALUE FOR HIGH RISK/COST PATIENTS

David Moen, M.D., is president of Bluestone Solutions LLC, which focuses on eliminating unnecessary hospitalizations and readmissions by bringing key services into the homes of high-risk patients before acute situations arise.

FROM DEMONSTRATION TO ADVANCED PREVENTIVE SERVICE

Ken Coburn, M.D., M.P.H., is co-founder, CEO and medical director of Health Quality Partners, which has designed a health care model that has reduced deaths, reduced hospitalizations and lowered cost for high-risk, chronically ill Medicare beneficiaries.

Marjorie Bowman, M.D., M.P.A., dean of the Wright State University Boonshoft School of Medicine, will return as our moderator.

The general morning session will be followed by a luncheon and reception for physicians and students. Additional sessions will be available to undergraduate students, medical students and residents.
