Walgreens
over 30% of the organizations in attendance were based outside of Ohio
Students do not realize there could be employers waiting in the “greeting area” to talk to them. They arrive too early or right before the interview. Because of this, students should plan to arrive 15 minutes prior to an interview to potentially have the opportunity to talk with an employer while they wait.

Be flexible when called for next-day interviews. This interview may lead you to a career. Missing or rescheduling a group meeting will be worth it, even if it is just for interview experience.

I would suggest students get more hands-on extracurricular experience early on in their careers. Hands on experience doesn’t have to be a job per se, but we want students with a passion for their field. So in IT for example, a personal portfolio of code they’ve written or personal projects like websites, mobile apps, or other work they’ve done.

Identify recent Alumni who work for the company, or current students who have a co-op with the company. Having a personal connection during the interview will help your chances of being hired.

Students should thoroughly research a company they are interviewing with. Even if interviews are on-campus, they should dress in business attire rather than casual/business casual. Students should come prepared with questions. They should not be afraid to take a brief pause before answering a question.
