ADVANCED PROJECT MANAGEMENT

This one-day class is an excellent follow-up for people who attended Project Management Essentials I & II. This class takes a "deeper dive" on some of the topics that we had to skim in the Essentials class, such as Resource Management and Managing Multiple Projects. We also take a closer look at the concept of Critical Path and how to use it when executing a project. This program places emphasis on the ability of participants to apply key skills and techniques to practical project situations. The class includes a two-hour exercise in which participants work in teams to make decisions and develop a project schedule for a very demanding client.

THIS PROGRAM WILL HELP LEADERS:

- Apply Essential Project Management Skills and tools to real project situations
- Manage multiple projects
- Resource management techniques
