Creating an Environment for INNOVATION ON CAMPUS

KAREN OATES

PROFESSOR OF BIOCHEMISTRY

DEAN OF ARTS & SCIENCES

WORCESTER POLYTECHNIC

INSTITUTE

What can one do to create the environment for innovation? Many people believe the single difference between the innovator and the ordinary person is that the innovator sees the dots and connects them, while others either did not see them at all- or if they did, they did not explore, question or connect them. In this interactive presentation, we look at the environmental drivers of innovation and the motivators that link the learning ecosystems.
