

You'll build bridges to a lot of things.
INCLUDING SUCCESS. 

MINORITY STEM SUMMER BRIDGE PROGRAM JULY 14–20, 2013

Through the Minority STEM Summer Bridge Program, incoming minority first-year students majoring in science, technology, engineering or mathematics (STEM) can get a head start on their University of Dayton experience. There is no cost to attend, and all meals, housing and activities are included. Students are responsible for transportation to and from campus. The program is great — take it from some of our students who participated last year:

“ *[It] gave me insight into how I should prepare for class and continue to strive for my best.* ”

CANDICE KEESE

“ *I had fun meeting new people and my future professors!* ”

ALEXANDER KINKADE

“ *It gave us an upper hand. We made great friends, [had] fun experiences and a chance to experience a week as a college student.* ”

KAROLA ENDARA

“ *The people and experience obtained during this program were amazing.* ”

BEVERLY DINES

“ *It gave us such a heads up. I feel so much more comfortable going into my first year. The STEM program helped me prepare mentally for the challenges to come.* ”

GRACELYN KEY

“ *I loved making new friends and being given an opportunity to live the college life before starting my first semester.* ”

DANNY RAIMONDI

“ *It gives incoming UD students a taste of campus life at the University of Dayton.* ”
