

Windows 7 Wireless and Printing Setup

Wireless Access Instructions - Windows 7

- 1) Click the wireless icon in the system tray at the bottom right of the screen and click on **UDwireless**.
- 2) Put a checkmark in the “Connect automatically” box and click **Connect**.
- 3) Close the dialogue box and launch a web browser. Login to the University of Dayton Network Access page using your LDAP (Novell) Username and Password
- 4) Scroll down the page and click on **Install Cisco NAC Agent**. Restart your computer and wait for the Cisco screen to come up. Login using your LDAP username and password.
- 5) Go to <http://software.udayton.edu>, download and install all software in the Essentials window (Microsoft Windows Updates at UD and Symantec Endpoint Protection) ***** If you have antivirus, you may not need to install our version of Symantec. Please check the following link for permitted products. *****
[Cisco Compatibility List](#)

Installing the iPrint Client – Windows 7

- 1) Go to <http://software.udayton.edu> and login using your LDAP username and password.
- 2) Click on **Vendor** and scroll down the list and click on **Novell**.
- 3) Click on **Novell iPrint Client 5.56**.
- 4) Scroll to the bottom of the page and accept the license agreement.
- 5) Scroll down and click on the **Download** button.
- 6) **Save** the file to the desktop.
- 7) Double click the **iPrint** installer and click **Run**, you may get a message wanting you to allow the iPrint installer to make changes to your system, click **Yes**.

The iPrint client is listed as not being supported on any Home or Starter edition of the Windows 7 operating system, however, we have been able to install and use it on Windows 7 Home Premium.

Installing the Printers – Windows 7

- 1) Once the iPrint client is installed, go to the Start Menu
- 2) Click on All Programs and find Internet Explorer
- 3) **Right click** on Internet Explorer and choose **Run as Administrator**.
- 4) Go to <http://iprint.udayton.edu/ipp> Scroll down until you find HP_P4015TN_KH212R_A and HP_P4015TN_KH212R_B (you can also use **Control F** open the Find command, type the name of the printer and press return)
- 5) Click on the printer name that appears in the list to install the driver. If an information bar appears and asks to install an **Active X** component, click **Allow**. You should see a dialog box asking for your LDAP username and password, login

and put a checkmark in the **Save Password** box and click **OK**. When the installation is complete you will receive a message the printer was installed. If you receive an error message try restarting your computer and repeat the Printer installation.

***** Printing *****

- 1) Choose the printer listed as HP_P4015TN_KH212R_A (or B) under **File, Print** in the program menu bar.
- 2) Click **Print**.
- 3) Open a browser and go to <http://printrelease.udayton.edu> (You may want to create a shortcut or favorite to access this more quickly. You have to go here to release any print job you send to the printers.
- 4) Login with your username and password, select the document(s) you want to print and click **Print** to release your job and send it to the printer.

Your job will be held for approximately 30 minutes before it is automatically deleted.

* You can send a number of print jobs to the printer and release them at the same time. The printers are located in the back of the Computer Lab in Zimmerman Library Room 212R.

* Please pick up your printing after you send it to the printers. All print jobs left from the day before will be discarded the following morning and pages will not be refunded.
