

## K-W-L Learning Strategy

This method helps you track your progress in learning various content. It often surprises us how much we already know once we write it out. Only after this step can you concentrate your time on what is left to learn. In the first column, write what you already know about the topic. In the second column, write what you want or need to know about the topic. In the last column, write everything new you've learned during the session.

<b>I KNOW</b>	<b>I WANT to Know</b>	<b>I've LEARNED</b>
