

# Screenshots of temporary UDMail login window and landing page during systems downtime, January 4 – 7, 2013

The screenshot shows a login window with the Google logo and "University of Dayton" header. On the left, there is a sign-in form with fields for "Username" (with "@udayton.edu" as a placeholder) and "Password", a "Stay signed in" checkbox, and a "Sign in" button. Below the form is a link: "Forgot your administrator username or password?". To the right, the heading is "Powerful communication and collaboration tools for your organization". Below this, it says "Google products and services provide you with the right tools to get your work done more quickly and easily." followed by two bullet points: "Collaborate more effectively online with your colleagues" and "Access your data from anywhere, even from mobile devices". Below the bullets, it says "If you are an administrator, sign in here for the control panel". At the bottom right, there is a yellow box with the heading "Download Chrome to get a faster & enhanced Google Apps experience". The text inside the box says "Chrome is a secure and stable browser that offers the fastest and most feature-rich Google Apps experience, including offline support for Gmail, Docs & Calendar." and "Deploy Chrome company-wide via the MSI or download Chrome for your personal use."

The screenshot shows a landing page with the Google logo and "About Google Apps" and "Help" links in the top right. The main heading is "Hi! Rudy" with the email address "rflyer1@udayton.edu" below it. A sub-heading says "Your account is managed by udayton.edu" with a "Learn more" link. Below this is a "TIP!" section with a lightbulb icon, asking "How can I find all the apps I'm allowed to use?" and a "Show me" link. The right side of the page is titled "Your services at udayton.edu" and lists several services with icons and brief descriptions: "Gmail" (More than Email...), "Drive and Docs" (Work together better...), "Google Calendar" (Stay in sync with your team...), "Google Talk" (Share quick thoughts in real-time...), "Contacts" (Store and organize contact information...), "Google Groups for Business" (Create mailing lists to share calendars, docs, sites and videos quickly...), and "Google Sites" (Shared workspaces for your team...).
