

Configure UD Google Apps for UD-owned Blackberry devices

UD-owned Blackberry devices are managed via connections to our Google Blackberry Enterprise Server (GBES). The software allows users to access components of their UD Google Apps accounts (Gmail, Calendar, and Contacts) using the built-in BlackBerry applications.

Faculty and staff using UD-owned Blackberry devices should contact the UD Help Desk at (937) 229-3888 or helpdesk@udayton.edu to make arrangements to have their device configured.
