

Novell Client Fix w/o Reinstallation

1. Right Click on the red 'N' in the system tray next to the clock
2. Select the 'Novel Client Properties..' option
3. Click on the 'LDAP Contextless Login' tab
4. Make sure there is a check mark in the 'Enable LDAP Treeless Login' option

5. Click on the 'Service Location' tab

6. Add the following 2 servers to the 'Directory Agent List' by typing the server name and then clicking the 'Add' button
 - a. oeslp1.servers.udayton.edu
 - b. oeslp2.servers.udayton.edu
7. Delete any old servers that are still there by selecting the servers, ctrl+click to select multiple and then click the 'Delete' button
