

## Installing the Network Access Control Agent (NAC)

created by: Zachary Burke

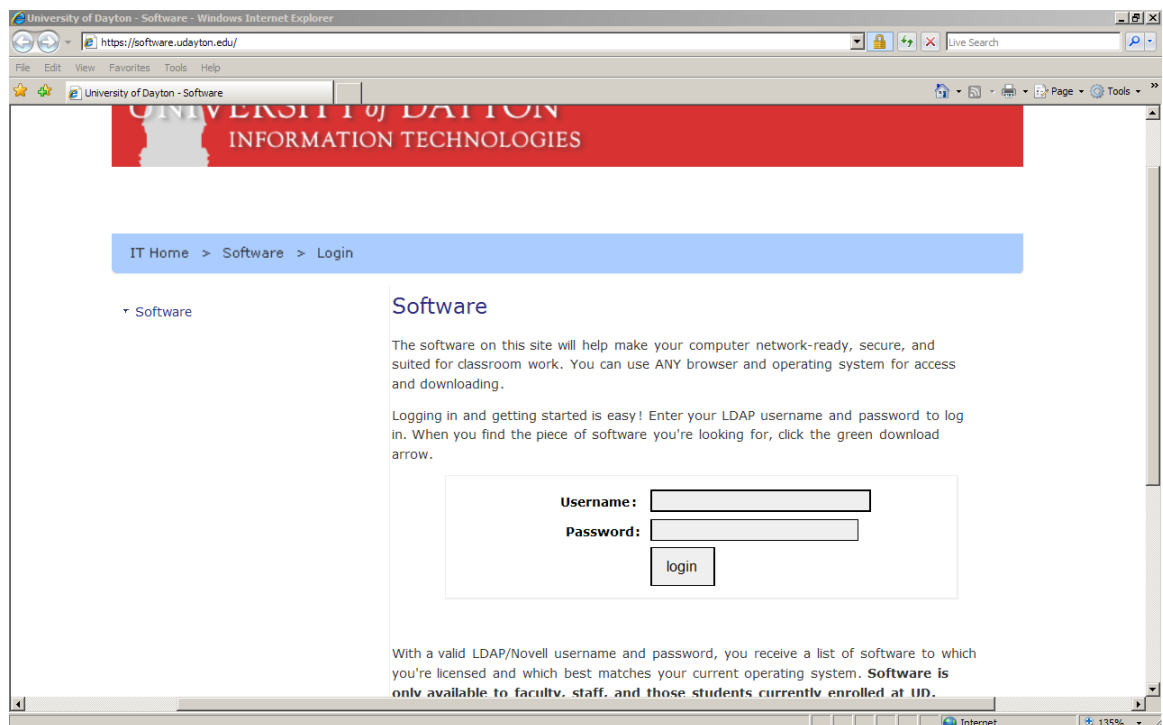

---

### Background

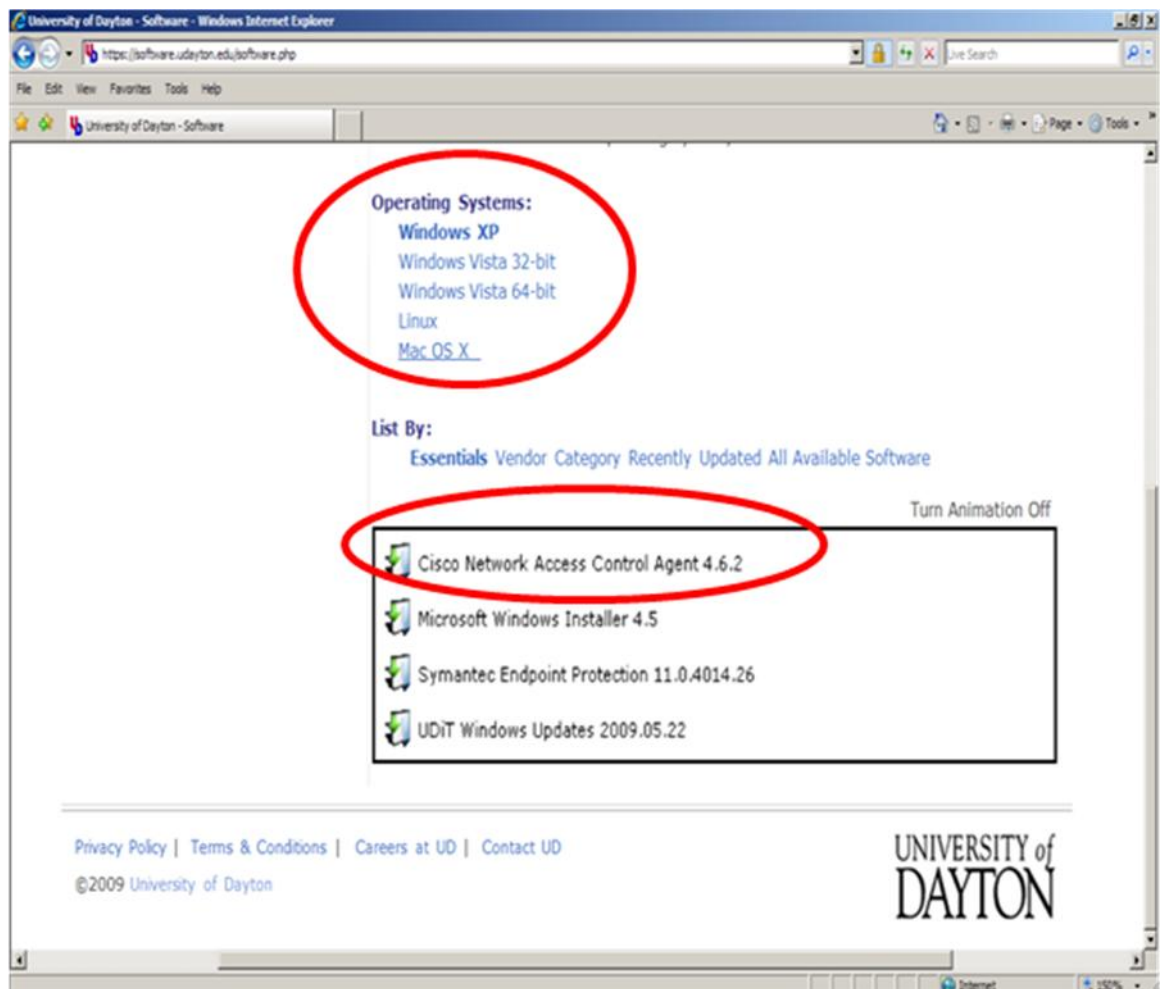

Installing the Network Access Control Agent (NAC) onto your computer will allow you to receive access the UD network. Without downloading this agent, access to the UD network will not be possible. Beginning August 5<sup>th</sup>, 2009, this download will be necessary to receive access to the network.

### Step-by-step for using Software UD

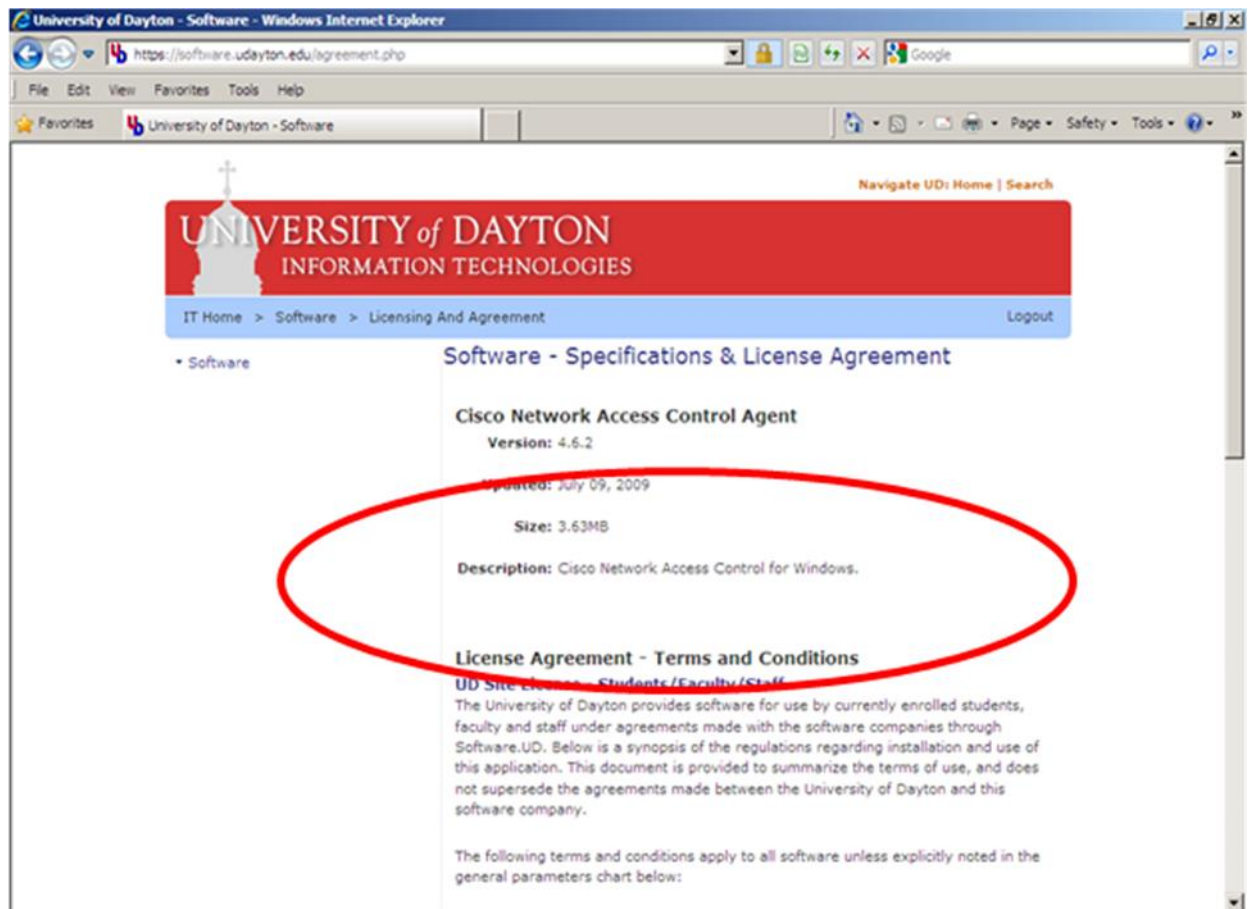

1. Open your web browser.
2. Go to the website: <http://software.udayton.edu>
3. Login in using your LDAP/Novell Username and Password.

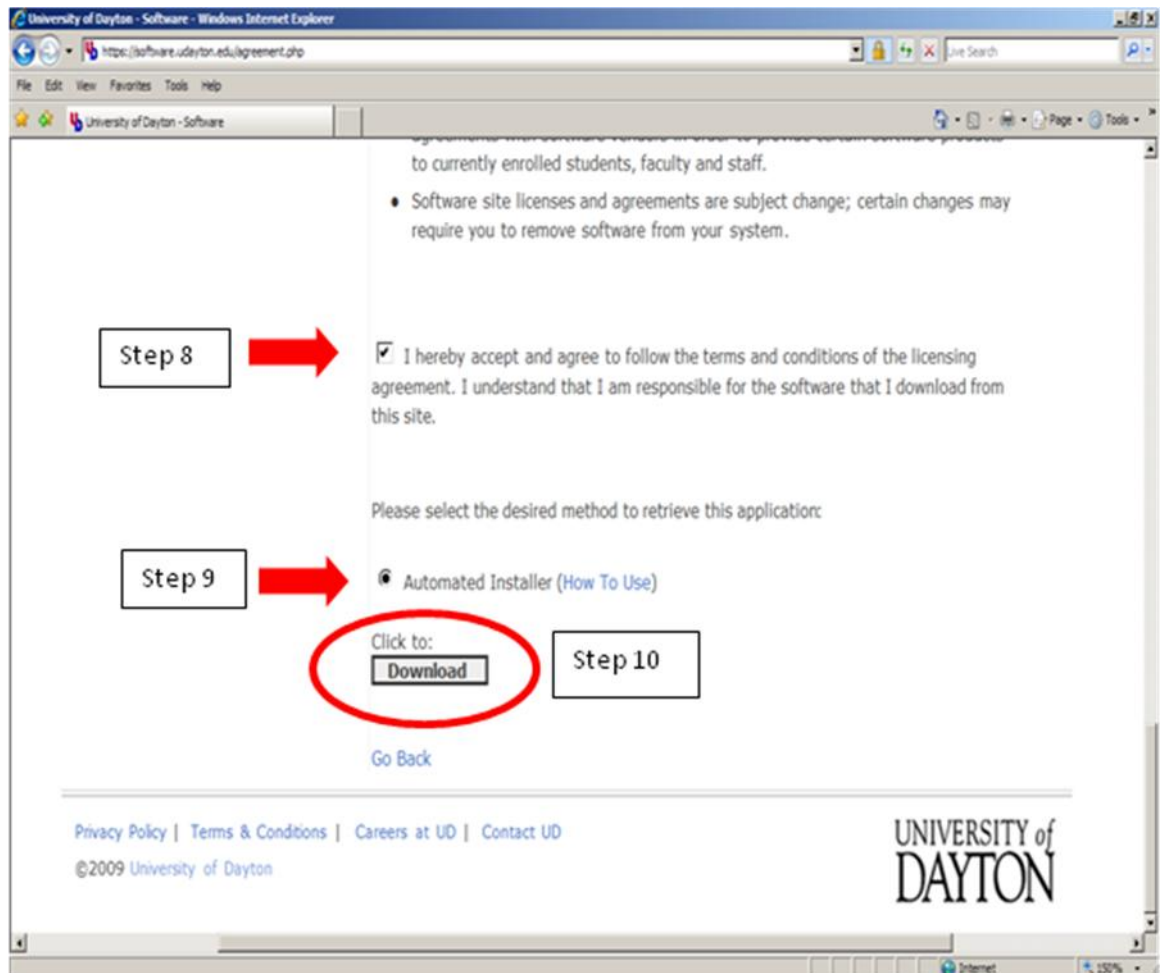

4. Select your operating system.

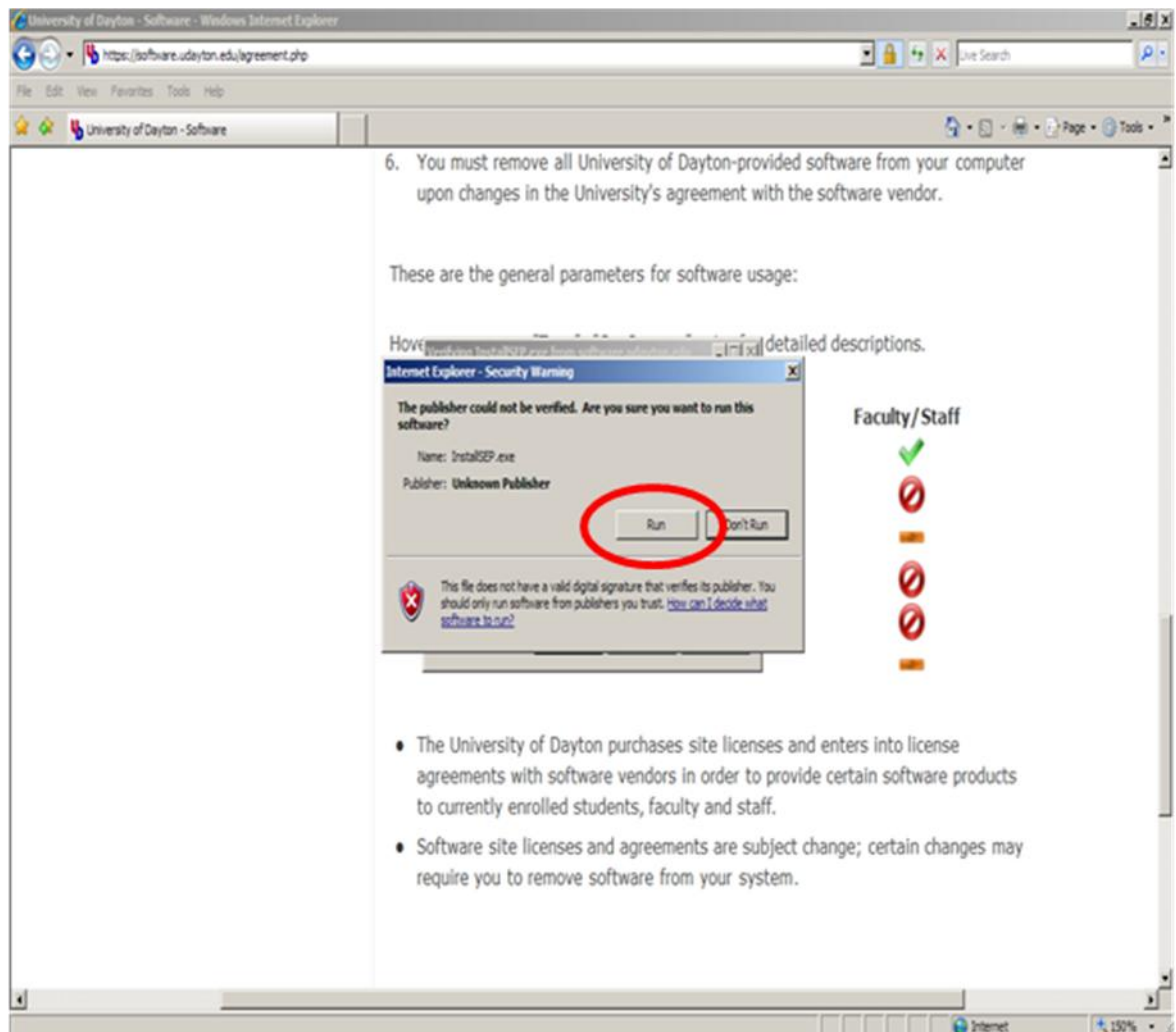

5. Select Cisco Network Access Control Agent 4.6.2.
6. View the description of the software.

7. Read and accept Terms and Conditions.
8. Verify Automated Installer is selected.
9. Click Download.

10. Save software installer to Desktop.
11. Run software installer.
12. If prompted by a Security Warning, click Run software installer.

13. Respond to messages until installation is complete.

TIP -Questions or problems call the IT Help Desk at 937-229-3888.
