

## How to Release your Course Grades

*By default, the course grade is hidden from students. The grade is hidden from students because it can look inflated if a faculty member hasn't entered in the zeros for missing assignments. This tip will show you how to make your course grades available to students. **\*\*\*Please remember that you still need to enter your midterm and final grades through Porches.\*\*\****

1. From within your Isidore course, click on the Gradebook tool.
2. Click on the "Course Grade Options" button in the menubar near the top of the screen.
3. Check the box next to "Display course grade to students now."
4. Click on the "Save" button.

### Course Grade Options

Student privacy is built in — students cannot see each other's grades.
