

Isidore Tip – Why Are Some Tool Names in Parentheses?

Have you ever wondered why some tool names are italicized and in parentheses? If a tool name is italicized and in parentheses, it is hidden from students' view. This tip will show you how to hide (and make available) tools to students.

If you wish to make a hidden tool available to your students (or wish to hide a tool from students) you simply need to navigate to the **Site Info--> Rename/Reorder Tools** and click on the light bulb next to the tool name. If the light bulb is yellow (on) then the tool is available to students. If the light bulb is gray (off) then the tool is hidden from students. Be sure to click the 'Save' button at the top or bottom of the screen when you're done.

(Tip continued on next page...)

Page Order

ⓘ Changes to the page ordering will not take effect until you click 'Save'. Editing, Hiding, or Deleting a Page takes place immediately. Pressing either the Save or Cancel buttons returns you to the Main Site Info Tool Page.
