

Running Internet Explorer 9 in Compatibility Mode

Some features and websites (like Isidore's Paste from Word feature) are not compatible with the new version of Internet Explorer (IE9). This tip will show you how to turn on Internet Explorer's compatibility mode. These instructions are written using Internet Explorer 9.

1. Locate the address bar of your web browser (where you type in isidore.udayton.edu). There will be a small icon that looks like a piece of ripped paper. This is the button to turn on compatibility mode.

2. If you click on the ripped paper icon, it will turn blue, indicating that compatibility mode has been turned on. The screen will refresh and you will be able to use features that were not working in Internet Explorer 9 (like Isidore's Paste from Word feature).
